

HONEYTEK

S Y S T E M S

You don't need a big business budget
to have big business technology.

The Landscape

Today...

Our networks are more sophisticated than ever before.

We have advanced voice, video and wireless technologies to communicate inside and between these networks.

There are an incalculable number of network security threats that we cannot ignore.

HoneyTek Systems designs custom solutions to expand, protect and optimize the performance of your networks.

Solving Problems and Creating Solutions

We...

Analyze

Dissect

And **Evaluate**

Your current situation to gain a solid understanding of your present issues and future objectives.

We...

Plan

Strategize

And **Design**

A solution that fits your business, satisfies your budget and helps you achieve your goals.

HoneyTek Professional Services

HoneyTek Systems' lineup of professional services can be broken down into four categories.

- 1 Security** Protect your network to minimize downtime and prevent attacks.
- 2 Networking** Deploy a solution that reflects the specifics of your organization for seamless delivery and optimal performance.
- 3 Wireless** Support and accommodate your staff and customers with advanced wireless solutions that enable anytime, anywhere, any device access.
- 4 Voice & Video** Take advantage of industry leading voice and video technologies to increase productivity and improve business communications.

Security

HoneyTek Systems' advanced security solutions prevent against attacks and protect your network.

Application Delivery Firewalls

Protect your corporate information with advanced firewall technology.

Access Security Solutions

Establish secure connections to global applications no matter where the location or what the device.

DNSSEC Solutions

Benefit from complete DNSSEC solutions that address security, performance and global availability.

DDoS Protection

Mitigate risks associated with network attacks from the network level right down to the application level with a comprehensive DDoS protection solution.

Vulnerability Assessment & Management

Gain insight into critical network vulnerabilities and threats to track overall security and performance.

Security Audits

Audit your network to understand current performance and benefit from short and long-term recommendations that will help you raise the stature of your security.

Networking

Custom networking solutions designed just for your business can help you optimize your day-to-day operations.

Load Balancing

Utilize, track and scale any application with flexible and robust load balancing services.

Network Discovery Gap Analysis

Identify network gaps to improve the flow of information and maximize performance.

Log Optimization

Troubleshoot effectively and support major business objectives by using important data available in your logs.

High Touch Engineering Services

Use preventative rather than responsive problem solving tactics by employing a dedicated HoneyTek engineer to manage your network.

Wireless

HoneyTek Systems' wireless solutions provide you with flexible application access to enhance productivity and improve the way you do business.

Site Surveys

We analyze and evaluate your site to determine the most efficient, comprehensive and effective wireless solutions.

Deployment & Integration

Using industry-best products and custom developed wireless solutions, HoneyTek seamlessly deploys and integrates your new technologies.

Audits

Track problems, monitor issues and identify bottlenecks in your wireless solution.

Voice & Video

Enhance your business communications through the implementation of advanced voice and video solutions designed by HoneyTek.

Deployment & Integration

We deploy and integrate new voice and video technologies into your existing business quickly and seamlessly.

Audits

Understand the strengths and weaknesses of your existing voice and video solutions in order to design custom solutions to improve business communications.

Voice Troubleshooting

Benefit from fast and resourceful troubleshooting to minimize service interruptions.

Video Conferencing

Simulate the experience of a live face-to-face interaction with intelligent and innovative video conferencing solutions.
