

The Shopify POS Cash Register

Point of Sale Processing Made Easy.

Cash Register Software for Retail Stores

Shopify's point of sale cash register brings all of the conveniences you know and love about your Shopify ecommerce store into your brick and mortar location. It's as easy as downloading our iPad application and instantly putting it to good use.

In your retail store, right from your iPad, you can view your product catalog, select products, pull up customer information and process orders. Swipe credit cards immediately and print or email receipts.

Automatically Sync Your Information

With the Shopify POS cash register, you'll never have to manage multiple inventories, product lists, customer databases or orders. Our system syncs all of your important business information between your online store and your offline store immediately and in real time.
